

PINPOINT®

for small field of view imaging in MRI

PinPoint provides technologists with the ability to position a marker precisely on a patient's point of pain or a specifically identifiable area of interest. Communication between patients, technologists, and interpreting physicians is streamlined as the area of interest is identified with precision and minimal distortion to pathology.

When the patient says, "it hurts right here", use PinPoint

Radiance® filled PinPoint on wrist

Radiance filled PinPoint imaged on film

REF 187
QTY 40/Box

PinPoint Provides Precise Localization

PinPoint directs attention to the precise area of interest

Old Methods Localize More Than Intended

Old methods localize a much broader region than the true area of interest
